

DANIEL SUDI ODENY

sQL dATABASE ADMINISTRATOR

OBJECTIVE

A proactive SQL Server Database Administrator with about 2 years of hands-on experience in busy environments including production, Test, and Development and in clustered and non-clustered. I am a Self-starter with exceptional problem-solving skills, active listening abilities, and strong interpersonal and persuasive communication skills.

Platforms:

Windows OS, Microsoft SQL server 2008-2022 and Hyper-V

Tools And Functions:

Jira, Data Migration Assistant (DMA), Activity Monitor, SQL Profiler, SSMS, TSQL, Configuration manager,

Technical SKILLS:

- Database design
- Performance Tuning

CORE COMPETENCY

SQL Server Migration | Always-on Availability & Log Shipping | Failover clusters | High Availability and Disaster Recovery Solution | Database Security | Performance Tuning | Database Backup & Recovering | SQL Statement Tuning | Window server | Replication | SQL Server Installation | Permissions Logins and Users | Virtualization.

PROFESSIONAL EXPERIENCE

KIAWITECHIT CONSULTING SERVICES

SQL DATABASE ADMINISTRATOR TEXAS

Nov 2021- Present

Responsibilities:

- I have been involved in planning the Installation of Microsoft SQL 2016, 2019; building, designing, Configuration, Upgrade, Migration and application of Windows and SQL Patches including Capacity Planning for servers and Databases.
- I have a schedule where using SQL Server profiler, Extended Events, activity monitor I monitor performance and health of database stability and system availability.
- I work with a team of DBAs where we undertake implementation of: Backup and Recovery strategies and Capacity planning, following the company's (RPO) and (RTO) and the Retention policy and setting up maintenance plans.
- I resolve database integrity issues, performance issues, blocking and deadlock issues, updating statistics for query optimization using performance and activity monitor, event viewers, extended events. Leveraging the uses of in-built software in SSMS such as SQL Server profiler, Performance monitor, Extended Events, DMVs, Database Integrity checks to ensure database integrity, stability, and system availability.
- I am responsible for recommending and implementing data security by creating users and assigning permissions based on the minimum level of database access the user would need and with tools like Always Encrypted, Transparent Data Encryption (TDE) and Dynamic Data Masking

- Backups/Restore
- Microsoft SQL server
- Transact SQL
- Active Directory
- Implementing Security Measures
- Configuration of Always on
- Configuration of Traditional Failover clustering
- Log shipping configuration
- Replication configuration
- Database Refresh
- Installation and database maintenance Programming languages (JavaScript).
- Version Control systems (Git).
- CSS Frameworks (Tailwind).
- HTML & Vanilla CSS.
- Deployment for Production (Netlify).

SOFT SKILLS

- GREAT TROUBLE SHOOTING SKILLS
- EXCELLENT COMMUNICATION SKILLS
- PAY ATTENTION TO DETAILS
- FLEXIBLE
- GREAT TEAM PLAYER
- EXCELLENT ANALYTICAL SKILLS

(DDM) to secure clients sensitive data.

- I have created and constantly monitored maintenance plans and agent jobs that take backups, DBCC checks, update statistics and defragment indexes for query performance.
- I work with developers to monitor query performance, Views, stored procedures, joins, functions, index tuning, Partitioning, compression, and statistics to enhance speed and maximize system performance.
- I have configured (HA&DR) Solutions on productions systems like Always On, Traditional Failover Clustering (Windows Server Failover Cluster - WSFC), Replication such as peer-to-peer, merge, transactional replication and Log Shipping to ensure the databases are always available and participating in disaster recovery testing.
- Migrated Databases from SQL to cloud environments and applied management skills.
- Update statistics, database integrity checks and Backup operations
- Responsible for monitoring and trouble shoot log shipping.
- Installed and configured SQL server following best practices.
- Reviewing and optimizing virtual machines environments
- Used Data partitioning, Snapshot isolation in SQL server.
- Database Design and Modelling
- Troubleshooting and resolving issues that may arise with SQL server.
- Performance Tuning for optimized results using tools like Sentry One and solar winds Monitoring tools.
- Maintained Database Response times in 24/7 Production Environment
- Configured and managed Contained Databases
- SQL server Profiler, Extended events, Query store and Database Tuning Advisor (DTA) for performance
- Planning and implementation of Database Backup/ restore and Disaster Recovery
- Technical knowledge of an implementing of and experience with installing, upgrading, configuring and deploying end user hardware
- Respond to and resolve database access and performance issues.
- Experience conducting code reviews with application developers to ensure best practices for data access are used

RECENT PROJECTS

REFERENCES

Available Upon Request

DATE OF BIRTH: 28/09/1998

PLACE OF BIRTH: NAIROBI

Nationality: Kenyan

- Installed SQL Server 2019 in the Non-Prod and production environments and set up a Traditional failover cluster. Participated in SQL 2016 Upgrades to SQL Server 2019 and Migrated databases from SQL Server 2016 to SQL Server 2019.
- I worked in a team that successfully migrated the organizations database to Azure using Data Migration Assistant.
- I applied SQL server patches on production and non-Production servers.

EDUCATION

Moringa school

- Certificate in Software Engineering. May 2023 - November 2023

KIAWITECH IT ACADEMY HOUSTON TEXAS

- Completed 300+ hours Hands on Training Program using SQL server 2016 ;
Proficiency in MS office 365
(MS Word, Excel, PowerPoint, Outlook): March 2021 - Oct 2021

Certifications:

Microsoft Certified Professional (MSCA) – In progress

Microsoft Azure Database Administrator (Az-104) – In Progress

Languages

English

Swahili

HOBBIES

Sports (Soccer), Listening to music and reading.
